

# One-Day Workshop on Realizing Sustainability – Role of Contract and Law in Indian Construction

## About the workshop

Low carbon and lean construction research aims to develop and promote sustainable materials and practices in construction.

When research efforts culminate into the final industry-ready product (or process), the next task will be the implementation. In this workshop, experts will guide us to embrace sustainable practices in construction projects practically.

**Panel discussion on  
"Making Lean and Sustainable Construction Implementation Possible – A Push or a Pull Approach?"  
Way forward for the Indian scenario**

## Themes and Speakers

- ≡ Implementing sustainable construction - experience sharing  
**Dr. K N Satyanarayana – Director, IIT Tirupati**
- ≡ Sustainable Construction – A Technology Implementation Perspective  
**Dr. Senthilkumar V – IIT Palakkad**
- ≡ Are existing procurement practices supporting sustainable and lean construction practices? Is there anything more to be done? - A Public Sector Perspective  
**Mr. Nirmal Goel – CE, CPWD**
- ≡ Are existing procurement practices supporting sustainable and lean construction practices? Is there anything more to be done? – A Private Sector Perspective  
**Mr. R Shankar Narayanan – L&T Construction – B&F IC**
- ≡ Sustainable cities and built environment - A Legal Perspective  
**Ms. Nidhi Batra – Sehreeti Developmental Practices**
- ≡ Beyond Sustainability - Can lean construction practices help minimize construction disputes?  
**Dr. Venkata Santhosh Kumar Delhi, IIT Bombay**
- ≡ Facilitating sustainable and lean construction practices through public procurement- A Researcher's Perspective  
**Dr. Ashish Goel, IIM Sirmaur**
- ≡ AI and Sustainability – Where are we and what is needed?  
**Dr. Murali Jagannathan, IIT Madras**
- ≡ International perspective on implementing sustainable practices in construction projects  
**Dr. Johan Ninan, TU Delft** will join during the panel discussion
